# How to connect to your **nbn**<sup>™</sup> service.

Set-up your new modem and get connected.

Welcome to the **nbn** network with Southern Phone.

Here's your quick starter guide, with everything you need to know to set-up your modem and get started on the **nbn** network.

#### First, check what's in the box.

Check you have each of these ready:

- ✓ Modem
- Modem power cord
- ✓ Telephone cable

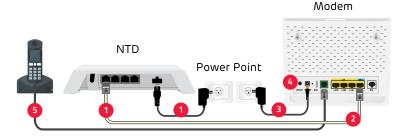

## Next, find where your Network Termination Device (NTD) is.

Your Network Termination Device (NTD) is where you connect to the **nbn** network from inside your home.

Many houses will already have a NTD installed. It usually looks like a large box fixed on a wall, and is already connected to a power supply unit and sometimes a backup unit, too. Make sure you leave any cables installed by the **nbn** technician connected at all times.

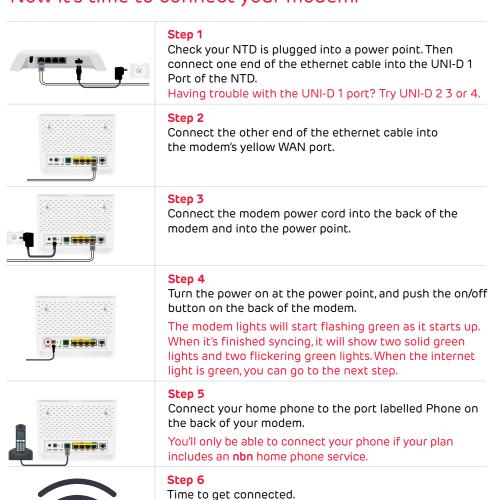

Once you've found your NTD, you're ready to connect your modem to it. If you don't have or can't find your NTD, or you're having issues setting it up, let us know and we'll help sort it out.

Once your **nbn** connection is confirmed, we'll send you an email letting you know it's time to complete the set-up of your modem.

### Now it's time to connect your modem.

modem.

To connect a WiFi device, you'll need the **WiFi Network**Name and the WiFi Password that is on the base of your
